David Wygant (Venture Crew 1776) got a call from his son Jake, a lieutenant in the Air Force with a current assignment as morale officer. Jake asked about getting 200 pinewood derby cars shipped to him so the men/women at the base can run some races. There have been arrangements made with the engineering department to make a shop and tools available so the personnel can make their cars, plus the engineers have committed to a top notch track. Since Jake is due to return back to the states at the beginning of May, pinewood derby cars and money for shipping is in high demand.

We are hoping this will be a continued morale booster with a traveling pinewood derby car.
